Muhammad Haziq Faruqi Bin Nazali

Information Technology Graduate | Software Development | Laravel & PHP | Web Applications | Quality Engineering

Information Technology Graduate (BIT Hons., UiTM, CGPA 3.6) with two web developer internships building **Laravel**, **PHP** and **WordPress/WooCommerce** applications. Built a ticket-booking system with QR check-in, a social media auto-posting plugin using **OAuth 2.0**, and **Laravel Blade** pages from Figma designs. Comfortable with **MySQL**, **Ubuntu** servers, testing and debugging my own builds, with a strong interest in **software testing and quality engineering**.

Work Experience

2026-03 - 2026-07

IT Internship

Laurea People's Signature Sdn. Bhd., Cyberjaya, Selangor

- **Movie Ticket Booking System:** Built a WooCommerce booking flow where admins manage movies, screens and showtimes, and customers pick seats on a seat map. Added QR tickets that turn "used" once staff scan them.
- **Booking Email Fix:** Tested the full booking flow as a customer, found that confirmation emails were not sending, and fixed it by setting up Gmail SMTP.
- **Social Media Auto-Posting Plugin:** Built the PHP backend and API endpoints with OAuth 2.0, traced failed posts to the root cause, and added AI-generated posts with scheduling using WP Cron.
- **WomenAtlas Summit Website (Laravel Blade):** Turned Figma designs into about 6 responsive pages using Blade template inheritance, revised over several review rounds with the designer.
- **Client Website Redesign (Elementor):** Rebuilt 5 pages, fixed iPad and mobile layouts, and converted images to WebP for faster loading.
- **Site Maintenance & Delivery:** Ran WordPress updates after backups, added MailerLite signup and SEO meta tags, and wrote minutes for client change-request meetings.

2023-09 - 2024-03

Web Developer Internship

Object Expression Sdn. Bhd., Cyberjaya, Selangor

- **Government Portal Features (Laravel):** Added new application types with extra form fields, attachment upload rules, print/export and running-number logic, working from client-approved Figma mockups. Fixed bugs raised in client testing on staging.
- **Officer Dashboard:** Built a dashboard with filtering and role-based notifications for 3 user roles, refined through client meetings.
- **Maintenance & Helpdesk:** Maintained a Laravel/Vue.js government system, resolved 25+ user complaints, fixed data issues and restored production databases to staging for testing.
- **Deployment (Vue.js + NestJS):** Set up the project locally, fixed a captcha display bug, then built and deployed to staging and live on Ubuntu.
- **Server Basics:** Used SSH, edited Apache config, renewed an SSL certificate and backed up files before a server shutdown.
- **Requirements & Documentation:** Attended URS workshops, wrote requirement and workflow documents for new modules, designed the UI in Figma, wrote setup guides and taught 2 colleagues database queries.

Education

2026 **Bachelor of Information Technology (Hons.)**
Universiti Teknologi MARA (UiTM) - Selangor, Malaysia

2024 **Diploma in Computer Science** | CGPA 3.51
Universiti Teknologi MARA (UiTM) - Terengganu, Malaysia

Awards & Achievements

- **Gold Medal, INTARG® 2024 International Innovation Fair** (2024)
  e-Rodong Mental Health App UI/UX Project
- **Platinum Award, INTARG® 2024** (2024)
  e-Rodong Mental Health App UI/UX Project

Selected Projects

Houseboat Booking System — Laravel | (2025-2026)
Freelance Full-Stack Developer
- Developed a full-stack booking platform with reservation management and automated email notifications.
- Integrated **Google Calendar API** for real-time booking schedule synchronisation.
- Implemented availability tracking and end-to-end booking workflow to improve user experience.

Content-Based Recommender System — Laravel & Python FastAPI | (2025-2026)
Freelance Full-Stack Developer
- Developed a hybrid web application integrating Laravel frontend/admin system with Python-based recommendation services.
- Built personalised recommendation logic using content-based filtering techniques.
- Connected FastAPI services with MySQL database for real-time data processing and recommendations.

Food Surplus Redistribution Web-Based System - MyFoodshare | **Final Year Project** (2025-2026)
- Developed a food surplus redistribution web application using Laravel backend API and responsive frontend architecture.
- Implemented a location-based matching algorithm to connect food donors with nearby recipients efficiently.
- Integrated a QR-code verification system for secure food pickup and transfer tracking.

e-Rodong Mental Health Consultation App | (2024)
UI/UX Designer & Prototype (Freelance Consultant)
- Designed high-fidelity UI/UX prototypes and user flows using usability-focused design approaches.
- Conducted competitor analysis, information architecture planning, and interactive prototyping.
